

BOOPESH K

Electronics & Communication Engineering | Embedded Systems | IoT | Full-Stack Development

Salem, Tamil Nadu, India • 007boopesh@gmail.com • linkedin.com/in/boopesh007 • github.com/007boopesh

PROFESSIONAL SUMMARY

Electronics & Communication Engineering student with a practical interest in embedded systems, IoT, PCB design, full-stack development, AI/computer vision, and modern computing. Enjoys bridging hardware and software to turn ideas into smart, practical solutions, with hands-on exposure to microcontrollers, sensors, automation, communication, and technical project development.

TECHNICAL SKILLS

Embedded Systems	IoT	PCB Design	Arduino
Python	OpenCV	Full-Stack Development	AI & Computer Vision
Git	GitHub	Video Editing	Graphic Design
Adobe After Effects	Adobe Media Encoder	Adobe Premiere Pro	Adobe Photoshop

EDUCATION

B.E. — Electronics & Communication Engineering

Government College of Engineering, Salem — Salem, Tamil Nadu, India

Diploma Education

Thiagarajar Polytechnic College, Salem — Salem, Tamil Nadu, India

School Education

St. Vincent Pallotti Matriculation Higher Secondary School — Salem, Tamil Nadu, India

PROJECTS

- **Li-Fi Video & Audio Transfer | Communication** — Explored visible-light communication for wireless audio and video data transfer.
- **Vehicle & License Authentication | Embedded / AI** — Developed an intelligent vehicle-authentication concept combining image processing and identification technologies.
- **Intelligent Speed Regulation Using Python | Python** — Designed a Python-based intelligent system concept to monitor and regulate vehicle speed using automation.
- **Smart Exam Time System | Embedded** — Developed an embedded-system concept for examination timing and notification requirements.
- **Stress Analysis and Prediction System | IoT** — Explored sensors, monitoring, communication, and intelligent prediction within an IoT and embedded-system concept.
- **Blockchain Technology | Research** — Presented technical research on blockchain applications for healthcare security, privacy, data integrity, and secure digital health records.

EXPERIENCE & TECHNICAL EXPOSURE

- **PCB Design Internship** — Hands-on exposure to PCB design concepts, electronic circuits, circuit planning, component placement, routing, schematic understanding, and hardware-oriented problem solving.
- **Industrial Training Experience** — Industrial exposure connecting engineering concepts with professional workflows, practical implementation, technical documentation, teamwork, and real-world problem solving.
- **Technical Project Presenter** — Presented technical projects by explaining concepts, system architecture, implementation approaches, technical challenges, and real-world applications.
- **Robotics & IoT Development** — Hands-on experimentation with Arduino, sensors, embedded systems, IoT concepts, robotics, automation, and connected-device solutions.

ACHIEVEMENTS & ACTIVITIES

- **Blockchain for Healthcare Security** — Technical paper presentation covering healthcare data security, blockchain architecture, privacy, and data integrity.
- **PCB Design Internship** — Practical experience in PCB layout and routing, circuit design concepts, and hardware development.
- **Technical Project Presenter** — Technical communication through project presentations and academic/technical activities.
- **Robotics & IoT Development** — Hands-on exploration of embedded systems, IoT development, and robotics concepts.
- **Technical Events & Workshops** — Participation in technical learning activities focused on emerging technologies and team collaboration.
